Lesson Aim

Main aim: By the end of the lesson, learners will have practised reading for supporting details in a business article about customer service, brands, and quality products.

Subsidiary aim: Learners will also have practised listening for specific information from a video about young entrepreneurs, and discussed their own ideas about what makes a company valuable.

Lesson Stages

Lesson Stages

Time	Goal	Procedure	Int
STAGE 1: Discussion			
5 min	To activate interest in the topic of business success	• Pairs discuss: How can you be successful in business? • Elicit 4–5 ideas and write them on the board • Introduce the infographic tips from p. 44 (check emails a few times a day, eat a healthy breakfast, plan in minutes, do the hardest tasks first) • Ask: Which of these do you agree with? Anything you would add? • Transition: We are going to watch a video about young entrepreneurs in China and see how they became successful	Pairs → T-Ss

Time	Goal	Procedure	Int
STAGE 2: Video – Three-Level Challenge			
10 min	To listen for specific information about young entrepreneurs in China	• Explain the three-level challenge format before playing the video • Level 1 (stronger Ss): Answer the While you watch questions (p. 45) using the handout to read along while watching • Level 2 (most Ss): Write notes while watching, then use the handout to check your answers after • Level 3 (challenge): Take no notes during the video, try to answer the questions from memory after the video ends • Play the video once • Ss pair check their answers regardless of level • Whole-class feedback: confirm correct answers and clarify any confusion • Quick discussion: Why do you think Song left his job? Is Cui Ernan right that entrepreneurship isn't for everyone?	Indiv → Pair → T-Ss
STAGE 3: Vocabulary Preview			
5 min	To ensure understanding of key vocabulary before reading	• Ss look at the word box: brand, customer service, excellence, logo, quality, trust, value • Ask Ss to match each word to a simple definition or example • Assist with any difficult words – check comprehension by asking concept questions: • Drill pronunciation of any challenging words • Ss complete Ex. A1 (p. 46) for reinforcement	Indiv → T-Ss
STAGE 4: Reading Challenge			
16 min	To practise identifying main ideas and supporting details in a text using graduated challenge	• Explain the three-level format: • Ss read the text individually (p. 47) and work through Ex. C (p. 46 – match questions to paragraphs, predict word locations) and Ex. D (p. 48 – scan for supporting details, match to main ideas) at their chosen level • Pairs: share answers and discuss any differences • Whole-class feedback with text evidence for each answer • Groups of 3: compare which details (1–6) support which main idea (Ex. D2) and justify using the text	Indiv → Pairs → Group

Time	Goal	Procedure	Int
		Quick reflection: Which level did you choose? Was it the right challenge for you?	
STAGE 5: Critical Thinking			
7 min	To apply critical thinking skills to evaluate ideas from the text and form reasoned opinions	- Model the critical thinking process for Ex. E1 (p. 48): - T demonstrates with one option: I think customer service adds the most value because the text says it's more expensive to attract new customers than to keep old ones. But someone might argue quality products are more important because people buy things for what they are, not just how they're treated. - In pairs, Ss choose their own option and follow the four steps - Pairs share their reasoning with the class – encourage Ss to challenge each other politely - Extension: Ex. E2 – What other things not mentioned add value? (company hours, happy employees, quick service)	Pairs → T-Ss
STAGE 6: Wrap-up			
3 min	To consolidate key learning from the lesson	- Quick vocabulary recall: T shows a definition or example, Ss call out the word (brand, trust, logo, etc.) - Ask 2–3 Ss: What is one thing you think adds value to a company? Use evidence from today's text - Preview: Next lesson – Reading 2 "Starting on the path to success?" – we will look at what makes start-ups succeed or fail	T-Ss
